- LOGIN
  -one person will login once until they logout from the app.(no login each time app restarts).
  -how to create a new username and password?where is it saved?(new user)
- How to load a X-Ray from the device memmory?
  As of now the images are stored in andriod resources. We must have the abality to load new xray from mobile memory.
  After this is done, we will extend this capability to download from cloud FHIR repository. And also we have to save any xray to the cloud FHIR storage.
- Registration of Basic patient? Click and load only the selected patients X ray(if required use some cloud or on-primise / local-server storage).
- Upload X-ray images to respective patient (ie localhost /cloud).
- Please provide a image zoomig facility like any e-commerce website like flipkat,amazon.....
